Faculty:
Dr Göran Edner, Sweden  
Dr. Juhana Frösén, Finland
Prof. Juha Jääskäläinen, Finland  
Prof. Pierre Lasjaunias, France
Prof. Tiit Mathiesen, Sweden  
Prof. Mika Niemelä, Finland
Dr. Christina Sjöstrand, Sweden  
Prof. Charlie Strother, USA
Prof. Anton Valavanis, Switzerland  
Prof. Nils Wahlgren, Sweden
Prof. Olof Flodmark, Sweden  
Dr. Dan Greitz, Sweden
Dr. Lars Kihlström, Sweden  
Prof. Bodo Lippitz, Sweden
Prof. David Mikulas, Canada  
Prof. Jan Nilsson, Sweden
Dr Angelika Sorteberg, Norway  
Prof. Mikael Svensson, Sweden
Prof. Yannis Ventikos, Great Britain  
Prof. Roy Weller, Great Britain

Venue:
Nanna Schwartz aula, Karolinska University Hospital, Solna, Sweden

Registration fee: SEK 4000, VAT inclusive.
Coffee, lunches and the course dinner Thursday evening are included.
For registration form and details please see the website:  
http://www.neuroradiology.se
Deadline for registration and room reservation is September 14, 2007.
A limited number of hotel rooms are available at the Elite Palace Hotel,  
St Eriksgatan 115, 100 31 Stockholm, tel +46 8 56621700,  
fax +46 8 56621701. Please make your reservation directly with the hotel,  
quote “KARO 071017” for special rates.
This course has UEMS accreditation.

**Second Karolinska Neurovascular Course**

“The cerebral artery and its environment”

**Karolinska University Hospital, Stockholm, Sweden**

**October 18-19, 2007**

**Hosted by:**
Department of clinical neuroscience, Karolinska Institute  
Departments of neuroradiology and neurosurgery  
Karolinska University Hospital  
Stockholm, Sweden  
and  
Departments of neuroradiology and neurosurgery  
Rikshospitalet, Oslo, Norway

**Major sponsor and exhibitor:**
Boston Scientific

**Sponsors and exhibitors:**
ELEKTA Instrument AB  
Cordis Neurovascular  
Gothia Medical AB  
Philips Medical Systems  
Vingmed Svenska AB and MicroVention  
Siemens Medical Solutions

**Sponsors:**
GE Healthcare  
ev3 Nordic AB
Dear Friends,

Three years ago we met in Stockholm to discuss the topic “State-of-the-Art management of Arteriovenous Malformations of the Central Nervous System”. Now it is time for a second course, which will focus on a functional system “The cerebral artery and its environment”.

In recent years there has been important progress in the understanding of how the blood vessels interact with their surroundings, and how this can be seen or measured. As neurovascular specialists we all deal daily with the vascular and perivascular system. We have to comprehend and preferably master genetics, physiology, imaging and therapeutic aspects, a huge task indeed!

The program was created with the aim to illuminate this fascinating subject from many different angles, yet limit it enough to make it manageable. Another intention was to bridge the ever increasing gap between new research and everyday clinical practise.

We are fortunate enough to have among the lecturers many of the world experts on the cerebral vascular system, in health and in disease, from embryology to aging and atherosclerosis. All these highly renowned professionals have important information to share with us.

We hope you will join us for what will undoubtedly be two very interesting days in Stockholm.

Welcome!

Michael Söderman  Sören Bakke

The organizing committee of the second
Karolinska Neurovascular Course
